

A.T.M Shamiul Bashir

Software Engineer

I am a software engineer who creates high-performing applications with organized architecture. I'm also experienced in product design and client relations.

Experience

Feb 2023 - Present

Gram Unnayan Karma -GUK

Software Engineer

After receiving the client's requirement and then analysis. For example: - How much time will it take to develop the software? How many man hours will be spent? According to the requirement we have developed any module or whether we need to develop any new module or not. whether we need to do customization or not etc. Configure and test the front end when the order is final, and the software development is completed. Test and fix bugs within the stipulated time. Then begins the work of after-sales support. Also (Cloud Server, Domain, Hosting, Odoo ERP, Multivendor, Point of Sale Configure, Debugging) etc. related work. New Software Customization and Development Module. Default Module Inherit and Customization. Dynamic Report Customization. Server Maintenance. DB Create and Backup Maintenance. Postgres DB Maintenance.

Apr 2022 - Jan 2023

Xsellence Bangladesh Ltd.
